EXPERIENCE

MERN Developer

Comfygen Private Limited

📅 Oct 2023 – Present

📍 Jaipur, India

- Developed and maintained full-stack web applications using **Next.js**, **React.js**, **Node.js**, and **MongoDB**, delivering high-performance and responsive solutions for diverse business requirements.
- Enhanced user experience and interface responsiveness through efficient state management with **Redux Toolkit** and performance tuning on both client and server sides.
- Integrated **RESTful APIs** and modular components to enable real-time data synchronization, improving reliability and maintainability across multiple web platforms.
- Collaborated with **UI/UX designers** and cross-functional teams in an Agile environment to ensure seamless deployment, testing, and delivery of production-ready features.

Full-Stack Developer Intern

Pizone Infotech Solutions

📅 Jun 2023 – Oct 2023

📍 Pune

- Developed and maintained a full-stack web application for a government NGO, enhancing user engagement through responsive and accessible design.
- Created and optimized reusable front-end components using **React.js**, **TailwindCSS**, and **Node.js**, improving code maintainability and scalability.
- Enhanced website performance by **40%**, reducing page load time by **5 seconds** through efficient API integration and database optimization with **MongoDB**.

TECHNICAL SKILLS

- **Programming Languages:** C++, JavaScript, TypeScript, HTML, CSS.
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Angular, Redux, RESTful APIs, Axios, Tailwind CSS, Three.js, Socket.io.
- **Databases:** MongoDB, MySQL, DBMS.
- **Tools & Platforms:** GitHub, Postman, Netlify, Appwrite, Vite, Debugging Tools, Agile Development.
- **Core Concepts:** Object-Oriented Programming (OOP), Web Performance Optimization, Responsive Design, API Integration, Testing & Quality Assurance.

PROJECTS

TopDevFirms | Next.js | Node.js | MongoDB | TypeScript | ExpressJS | Tailwind CSS

- Designed and developed a **powerful, user-friendly web platform** inspired by Clutch, enabling users to **discover, research, and evaluate top software development companies worldwide**.
- Built a **dynamic directory system** featuring detailed company profiles with expertise, services, technology stacks, and client reviews, ensuring transparency and credibility.
- Implemented **advanced search and filtering functionalities** by industry, location, rating, and pricing to simplify discovery and improve user engagement.
- Developed a **company comparison tool** and an intuitive dashboard for managing firm data, user-generated reviews, and performance metrics.

Verified Platform | React.js | Node.js | Tailwind CSS | ExpressJS | JavaScript

- Developed a **secure and interactive professional networking platform** that enables users to create profiles, showcase achievements, and verify certifications and credentials with real-time validation.
- Implemented a **dynamic verification system** using backend validation and secure APIs, ensuring authenticity of user-submitted data and enhancing platform trustworthiness.
- Built **responsive and animated interfaces** using **React.js**, **Tailwind CSS**, and **Framer Motion**, improving engagement and overall user experience.
- Integrated **Node.js** and **RESTful services** for seamless data handling, user authentication, and role-based access control, supporting scalable and efficient platform management.
- Optimized **performance and accessibility** across devices to deliver a smooth, secure, and visually appealing frontend experience.
